## DETAILED ACTION

### *Response to Amendment*

The objection to the disclosure and the rejections under 35 USC 103 as described in paper no. 5 have been withdrawn in view of the amendment filed on June 25, 2003. The rejection under 35 USC 103 is withdrawn because there is no motivation to combine the Garwood and Grahame references.

### *Double Patenting*

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-20 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-16 of copending Application No. 10/059388 in view of Grahame (US (US 2,452,121)).

Claims 1-16 are drawn to a process in which olefins are combined with isobutane and the mixture is subjected to alkylation. The claims do not include the dehydration/isomerization step.

Art Unit: 1764

The Grahame reference discloses a process for manufacturing fuels from synthetic hydrocarbons. The process comprises reacting carbon monoxide and hydrogen in the presence of a catalyst (i.e., alumina catalyst) thereby producing a mixture of hydrocarbons. At least a fraction of the mixture of hydrocarbons contacts a catalyst at conditions that result in the conversion of oxygenated compounds (e.g., alcohols) present in the hydrocarbon fraction to olefins. Conditions include temperatures ranging from 700° to 900°F, pressures ranging from atmospheric up to about 25 psi, and space velocities ranging from 1 to 10. Additionally, the olefins present in the fraction are isomerized. The C<sub>3</sub> and C<sub>4</sub> olefins present in the resulting converted fraction may be further treated to produce naphtha. See col. 1, lines 1-48; col. 2, lines 15-29, 54, and 55; col. 3, lines 1-13 and 56-75; col. 4, lines 1-67; col. 5, lines 14-58; and col. 6, lines 21-32 and 59-64.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to have modified claims 1-16 by including the dehydration/isomerization step as suggested by Grahame because undesirable oxygenates will be removed as well as more of the desired olefins will be produced. More of the desired olefins in the process of Garwood will result in the production of more of the desired product

This is a provisional obviousness-type double patenting rejection.

### *Conclusion*

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO**

Art Unit: 1764

MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
